SUBJECT: CZECH REPUBLIC/MISSILE DEFENSE: RESPONDING TO  
RUSSIAN THREATS

REF: STATE 21640

Classified By: ADCM Michael Dodman for reasons 1.4 (b) and (d)

¶1. (C) As part of the ongoing dialogue with the Czech Republic on missile defense, both Washington and Embassy officials have briefed senior levels of the Czech government and opposition about U.S.-Russian consultations on missile defense and specifically the fact that the proposed MD system poses no threat to Russia. Since June of 2006 U.S. officials have briefed this material to both the current and former Prime Ministers, Defense Ministers and Foreign Ministers, as well as several other senior politicians and officials. All have accepted that Russia knows the facts and is milking the issue for political gain on other fronts, especially Russia's domestic political situation. Lower levels of the government, and select members of the press have also been briefed about the level of U.S.-Russia consultation. There is general acceptance that this system poses no threat to Russia.

¶2. (SBU) On February 21 Charge addressed a meeting of parliamentarians from the Foreign Affairs Committee, and members of the press, on the proposal to build a U.S. radar facility in the Czech Republic as part of the U.S. MD system. In the course of that briefing the Charge repeated the U.S. position that the system is not targeted against Russia, and reviewed the history of U.S.-Russian consultations on the topic. This appears to have quieted the Czech MPs, who had otherwise been very focused on exploring comments coming from Moscow.
